

COUNTY OF YORK

MEMORANDUM

DATE: November 19, 1999 (BOS Mtg. 12/15/99)
TO: York County Board of Supervisors
FROM: Daniel M. Stuck, County Administrator *DmS.*
SUBJECT: Sanitary Sewer Standards & Specifications

During the November 10, 1999, work session with the Board of Supervisors, the Department of Environmental and Development Services recommended certain changes to the Sanitary Sewer Standards and Specifications. As presented to the Board, the changes correct tables, references, construction techniques and testing procedures. These changes are an attempt to clarify the document and to reflect actual engineering and construction practices utilized today.

The details which are included in Appendix H were not available during the work session. Each detail has been modified accordingly to agree with the language provided in the Specifications' accepted standard design and construction practices. A final copy will be available for review at the December 15 Regular Meeting.

Since the work session with the Board, with the exception of the details, no additional changes have been made. I recommend adoption of proposed Resolution R99-224.
